DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al (US 5942862).

Claim 1: an apparatus comprising first and second motors (Fig. 1: 30,40) each generating a steering force applied to a steering system (col. 7:54-61) of a vehicle that is connected to wheels (Fig. 16:26-29) to assist a driver's manual steering effort in steering the wheels (26-29); first and second drive circuits (Fig. 1:91,92) for PWM controlling the first and second motors (30,40), each of the drive circuits including a switching element (Tr1-Tr6, Tr11-Tr16) switched on and off at a control frequency (col. 9:7-20, 9:53-10:15); a controller (Fig. 1: 90) determining the control frequency at which the switching element of the first drive circuit is switched on and off and the control frequency at which the switching element of the second drive circuit is switched on and off (Col. 10:32-56)

Claim 2: an apparatus comprising first and second motors (Fig. 1: 30,40) each generating a steering force applied to a steering system (col. 7:54-61) of a vehicle that is connected to wheels (Fig. 16:26-29) to assist a driver's manual steering effort in steering the wheels (26-29); first and second drive circuits (Fig. 1:91,92) for PWM controlling the first and second motors (30,40), each of the drive circuits including a switching element (Tr1-Tr6, Tr11-Tr16) switched on and off at a control frequency (col. 9:7-20, 9:53-10:15); a controller (Fig. 1: 90) determining the phase of a first pulse signal at which the switching element of the first drive

circuit is switched on and off from the phase of a second pulse signal at which the switching element of the second drive circuit is switched on and off (Col. 9:20-52).

Claim 3: the first and second pulse signals are provided with the same frequency (col. 10:48-67; 14:1-15) and different phases (col. 14:30-35)
